

DRIPSTOP—Condensation Control

- DRIPSTOP is the world leader in this type of condensation control. It has been on every continent in every climate condition across the globe.
- Applied directly to the panel at the factory.
- Smoke Generation and Flame Spread—UL 723 Approved.
- Noise Reduction—up to 20% of rain noise.
- DRIPSTOP provides a medium for trapping condensation in the specially designed pockets in the membrane.
- DRIPSTOP holds that moisture until conditions go back above the dew point and it is released back into the air in the form of normal humidity.
- It acts much like a sponge that soaks up the moisture when it appears and releases it as it returns to its humid air state.

Advantages

- Saves Money
- Saves Time
- Very Durable
- Helps Fight Corrosion
- Can be Installed in Windy Conditions
- Easy to Clean
- No Bird Nesting Troubles
- Reduces Rain Noise
